

DUNGEON SIEGE 1

THE UTRAEAN PENINSULA

INSIDE THE PIT OF DESPAIR

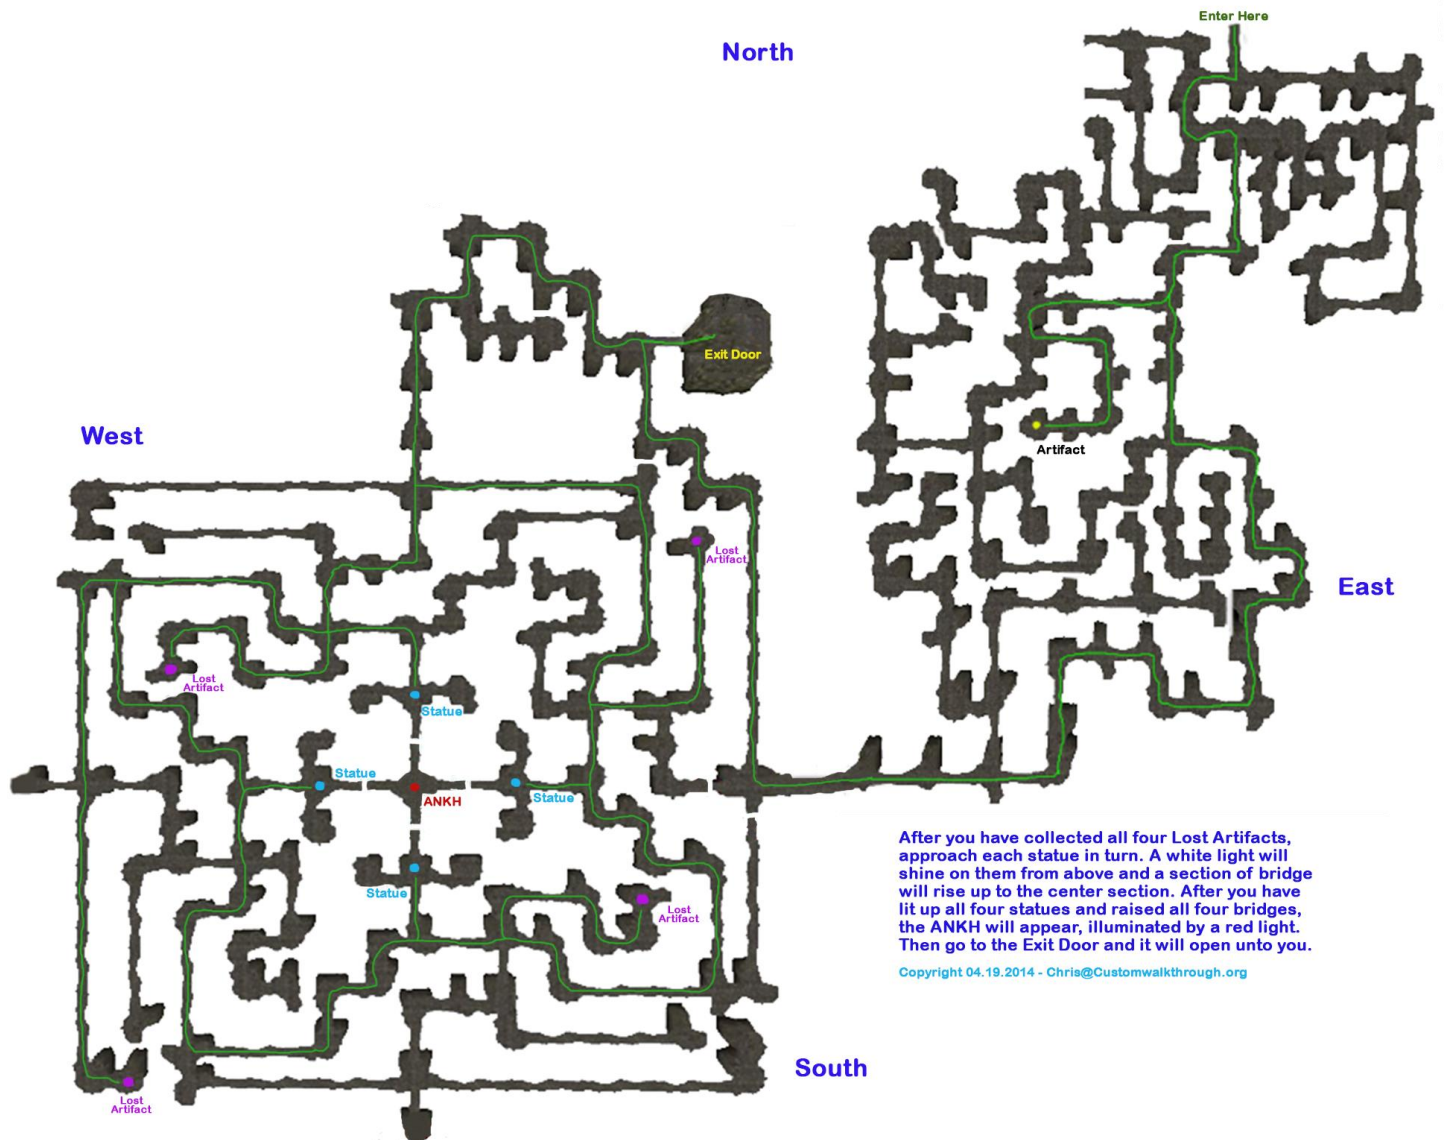

In Level One, pick up 3 skulls. With them you can open the door at the south end of the level, taking you to Level Two. Note that you must collect all three of the skulls in the same gaming session, or the exit door will not open. Two of the skulls are near each other, at the northeastern part of the level, but are tricky to get to. You can find a good red chest west of the starting point.

Level One

Level Two

In Level Two, collect four Lost Artifacts, distributed near the four corners of the western section of the level. These must be taken to four Statues near the center of the western section of the level. Then pick up the Ankh, which appears after you have activated all four of the statues. Find the Exit Door to Level Three at the northeast part of the western section of Level Two. I could find no use for the "Artifact" found in the eastern part of Level Two.

Level Three

Level Three is a series of stone pathways and stairways. Follow the stone pathways. When you come to the intersections, take four right turns and then a left turn. This takes you to the Exit Lift.
